Quarterly Journal in English,
established in 1957 as Minerva Nucleare,
the first scientific journal in the world
specifically devoted to Nuclear Medicine

THE JOURNAL OF NUCLEAR BIOLOGY AND MEDICINE

VOLUME 36 - 1992

Subjects Index - Authors' Index

Subjects Index

A

A11 and neuroendocrine tumors diagnosis, 150.
ACE-inhibitors, 145.
— and ^{99m}Tc-HMPAO SPECT, 132.
Acute myocardial infarction, 169, S II-139, S II-149.
— atrial natriuretic peptide, 79.
Acute rejection, 2, S II-52.
Adenosine myocardial scintigraphy, S II-73.
— ^{201}Tl myocardial scintigraphy, 225.
AIDS dementia and brain SPECT, 125.
— lung infections, 202.
Algorithm, in sequential radionuclide studies, 119.
Ambulatory radionuclide monitoring, 168.
— detector in left ventricular function, 117.
Anatech RB86, production of FDG, 172.
Angina pectoris, S II-42.
Angiography data, S II-152.
Anthracyclines cardiotoxicity, S II-160.
— ^{111}In-antimyosin scintigraphy, 109.
— echocardiography, 109.
— radionuclide ventriculography, 109.
Anti-DD Dimer MoAb, thrombi immunodetection, 207.
Anti-hydrazidophosphine, 296.
Anti-TSH-receptor antibody, thyroidectomy, 197.
Antibodies, anti-tumor monoclonal, 7.
Antimyosin scan, S II-134, S II-154.
Arterial hypertension, S II-42.
Arteriopathy, ^{99m}Tc-MIBI, 118.
Arthroprothesis, three-phase scintigraphy, 170.
Atherosclerosis, S II-35.
Atrial natriuretic peptide, 79.
— kinetic analysis, 143.
Atrophic chronic gastritis, 114.
— dyspeptic symptoms, 114.
— gastric emptying, 114.
Autoradiography, 46.

B

^{10}B neutron capture therapy, and tumor, 123.
B_{12}/Folate, simultaneous radioassay, 196.
BC-2 MoAb, Tenascin, 230.
Biliary tract cancer, serum tumor markers, 221.
Bis(dithiocarbamate) nitrido technetium(V), preparation and biodistribution, 124.
Blood pool, S II-134.
Blood pressure control, Captopril renal scintigraphy, 120.
Blood-brain barrier, 46.
Bone density, dual energy x-ray absorptiometry, 71.
— kidney transplantation, 72.
— quantitative computerized tomography, 71.
— single photon absorptiometry, 71.
— Procollagen-I, 72.
Bone marrow, scintigraphy, 303.
Bone metastasis, 52.
Bone scintigraphy, 52, 303.
Brain SPECT in childhood epilepsy, 130, 319.
— in post-anoxic coma, 109.
Brain tumors, with ^{201}Tl and SPECT, 101.
Brain, functional imaging, 90.
Breast cancer, and CA15.3, 115.
— and CA549, 102.
— follow-up, 85.
— isoenzimatic markers, 137.
— markers, 138.
— staging by lymphoscintigraphy, 96.
Breast neoplasms, 7, 52.
Breast tumors and IUdR injection, 154.

C

Ca 15.3, 52.
— breast cancer, 85, 115, 219.
CA-549, breast cancer markers, 157.
— breast cancer, 102.
CA19-9, mucine-like antigen, 95.
CA50, mucine-like antigen, 95.
CA195, mucine-like antigen, 95.
Calcitonin, radioimmunoassay kits, 161.
Calcium ATPase, S II-146.
Calcium metabolism, kidney transplantation, 72.
Cancer risk, ^{201}Tl treatment, 122.
Captopril renography, 309.
Captopril scintigraphy, renal artery revascularization, 120.
Carcinoid, ^{131}I-MIBG therapy, 80.
Cardiac dysfunction, ^{99m}Tc-MIBI, 207.
— equilibrium gated nuclide angiocardiography, 207.
Cardiac function in diabetics, S II-148.
Cardiac sarcoplasmatic reticulum, S II-146.
Cardiomyopathy, S II-134.
Cardiovascular adaptation in middle-age, S II-164.
Cardiovascular nuclear medicine, 291.
Carotid scintigraphy, 171.
Catamenial epilepsy, brain functional imaging, 90.
Cathepsin D, breast cancer, 138.
CEA test, colorectal cancer, 84.
Cercaria, 56.
Cerebral blood flow, carbamazepine therapy, 208.
— pain, 200.
Cerebral disorders, FDG distribution, 176.
Cerebral gliomas, ^{99m}Tc-PAO-biotin, 169.
— anti-Tenascin Moab, 169.
Cerebral perfusion, motor deficit improvement, 173.
Cerebral SPECT and neuropsychometrical tests, 147.
Cerebrospinal fluid, thymidine kinase, 166.
Child, 319.
Childhood epilepsy, ^{99m}Tc-HMPAO, 130, 319.
Chronic rejection, S II-52.
Collateral circulation in post-infarction, 141.
Colorectal cancer, CEA test, 84.
— diagnosis, 69.
— follow-up, 69.
— immunoscintigraphy, 69.
— radioimmunoguided surgery, 205.
Computer resources, procedure, 108.
Contractile function, S II-82.
Coronary angiography, S II-167.
— IMA post thrombolytic therapy, 231.
— artery angiography, S II-68.
Coronary artery bypass, S II-68, S II-142.
Coronary artery disease, 26, S II-68, S II-73, S II-102, S II-140, S II-141, S II-153, S II-162.

Coronary artery disease, ^{99m}Tc-MIBI gated SPECT, 89.
— ^{201}Tl, 117.
— ambulatory radionuclide detector, 117.
— dipyridamole test, 83.
— exercise test, 83.
— myocardial scintigraphic perfusion, 206.
— radionuclide ventriculography, 206.
Coronary bypass, S II-146.
Coronary hyperemia, S II-73.
Coronary microvascular disease, S II-42.
Coronary revascularization, 280.
Crohn's disease, and ^{111}In-leukocyte scintigraphy, 93, 119.

D

Detection of residual ischemia, S II-165.
Diabetes mellitus, diastolic dysfunction, 91.
— systolic function, 91.
Diabetic gastroparesis, erithromycin therapy, 209.
Digitalis-like factors, 41.
2-dimensional imaging, S II-108.
3-dimensional imaging, S II-108.
Dipyridamole ^{201}Tl SPECT, S II-155.
— myocardial scintigraphy, S II-73.
— scintigraphy, S II-161.
— echocardiography, S II-144.
— radionuclide angiography, S II-140.
— test, S II-139.
— test, and ^{201}Tl split dose, 105.
— ^{201}Tl myocardial scintigraphy, 225.
Dobutamine echocardiography, 280.
— infusion, S II-166.
— radionuclide ventriculography, S II-166.
— stress test, S II-141.
— test, and radionuclide angiocardiography, 105.
— stress radionuclide angiography, 232.
Down's syndrome, thyroid abnormalities, 198.
Doxorubicin, organ distribution and pharmacokinetics, 218.
— treatment in hepatocellular carcinoma, 218.
Dynamic line phantom, 141.

E

Echocardiography, 241, 284.
— planar myocardial scintigraphy, 177.
Echo-Doppler flowmetry, 309.
Electrocardiographic exercise test, S II-144.
Endemic goiter, iodine prophylaxis, 133.
Endocrinological effects, TRH T i.v. infusion, 174.
Epilepsy, 319.
Equilibrium gated angiography (EGRA), S II-139.
Esophageal emptying, in achalasia, 87.
Esophageal motility disorders, manometry, 220.
— radionuclide esophageal transit study, 220.
Esophagogastroplasty, scintigraphy, 86.
Essential hypertension and intravascular fluid volume, 134.
Exercise in ventricular function, S II-150.

F

^{18}F deoxyglucose (FDG), S II-62.
— labeled 2-fluoro 2-deoxyglucose (FDG), 267.
— FDG PET in multiple systemic atrophy, 140.
— FDG/PET and hybernating myocardium, 146.
— FDG, automated production, 172.
— SPECT, glucose metabolism, 176.
Fluoxetine, serotonin reuptake inhibition, 158.
Fourier amplitude analysis, quantitative, 81.

G

^{67}Ga-citrate scan, 341.
— in juvenile Hodgkin's lymphoma, 99.
— in pulmonary scintigraphy in AIDS pneumonias, 216.
— in pulmonary tubercolosis, 214.
Gastric emptying, diabetes, 209.
Gastro-esophageal reflux, children, 82.
Gastrointestinal tumor, serum neopterin, 167.
Gastrointestinal tumors and IUdR injection, 154.
— immunoscintigraphy, 96.
Gated radionuclide ventriculography, hemodynamic influence on liver, 164.
— tricuspid regurgitation, 164.
GFR determination, weighting factors, 193.
Gonadal function in thalassemia intermedia, 103.
Graves' disease, metimazole, 192.
— thyroidectomy, 197.
Gynecological malignancies, serum CA^{125} assay, 131.

H

Heart contractile reserve, S II-141.
Heart transplantation, 2.
Hepatic cancer, serum tumor markers, 221.
Hepatic portal index, radionuclide angiography, 186.
Hepatoblastoma, childhood, 210.
Hibernating myocardium, S II-118, S II-126.
HIV infection, serum neopterin, 185.
HIV-1, encephalopathy, 180.
Hodgkin's disease, immunoscintigraphy, 126.
HPLC, immunoscintigraphy, 212.
— labeled hormone, 143.
Hydrocephalus, brain perfusion, 215.
Hydroxyl-apatite, arthroplasty, 175.
Hyperacute rejection, S II-52.
Hyperbaric oxygen treatment, toxic effects, 176.
Hyperthyroidism, ^{131}I treatment, 75.
Hypoperfusion, S II-126.
Hypothyroidism, after ^{131}I treatment, 75.
Hypoxia, 56.

I

Ileum, Crohn's disease, scintigraphy, 119.
IMA post thrombolytic therapy, S II-167.
*I-MIBG, childhood neuroblastoma, 110.
^{123}I, phantom studies, S II-160.
— scintigraphy in thyroid cancer, 77.
— IL2, HPLC purification, 212.
— insulin kinetics, 213.
— MIBG, chemodectoma, SPECT imaging, 231.
— IBZM, dopaminergic receptor tracer, 107.
^{125}IUdR for tumor targeting in vivo, 154.
^{125}I-anti-CEA MoAb, radioimmunoguided surgery, 205.
^{125}I-labeled monoclonal antifibrin antibodies, S II-151.
^{131}I, chromatographic procedures in thyroid cancer, 144.
— therapy in thyroid carcinoma, 191.
— thyroid cancer, 122.
^{131}I-Ber-H2 monoclonal antibody, 126.
^{131}I-MIBG, therapy, 80.
^{131}I-MOv18 and ovarian cancer, 116.
^{131}I-therapy in thyroid adenoma, 150.
^{131}I-MIBG scintigraphy, neuroblastoma, 146.
^{131}I-MIBG, pulmonary endothelial function, 148.
Immunodetection of human atherosclerosis plaque, S II-151.
Immunometric tests, quality control procedures, 196.
Immunoscintigraphy, lung cancer, 128.
— malignant melanoma, 159.
— with ^{99m}Tc-F023C5-IgG$_1$, 96.
^{111}In antimyosin antibodies, S II-56, S II-91.
^{111}In-anti-CEA-F(ab')$_2$, bladder cancer, 78.
— immunoscintigraphy, 69, 78.
^{111}In-DTPA, colon scintigraphy, 228.
— oral administration in children, 228.
^{111}In-labeled F(ab'), 27.
^{111}In-leukocyte scintigraphy, in Crohn's disease, 93.
^{144m}In, 33.
Inflammatory foci, scintigraphy, 92.
Insulin dependent diabetics, S II-150.
— metabolism in diabetes, 213.
Intimal medial thickening, scintigraphy, 171.
Iodine prophylaxis, thyroid diseases, 133.
Ischemia, postexercise ^{99m}Tc-MIBI, 195.
Ischemic heart disease, S II-157.
Ischemic left ventricular function, nuclear angiography, 217.
Ischemic stroke, cerebellar diaschisis, 189.
— muscular tone, 189.

J

Juvenile Hodgkin's lymphoma, and ^{67}Ga scan, 99.

K

Kidney radionuclide imaging, 309.
Kidney transplantation, renal function, 184.
— renal function reserve, 125.
— transplant, 125.

L

Left bundle branch block, S II-153.
Left ventricular function, S II-146.
— in essential hypertension, 134.
— monitoring, S II-82.
— perfusion, S II-146.
Left ventricular systolic and diastolic function measurements, 168.
Ligands, 296.
Liver cirrhosis, radionuclide angiography, 186.
Liver, focal nodular hyperplasia, scintigraphy, 107.
Low T_3 syndrome, in loco, regional anaesthesia and narcosis, 127.
Lung cancer and [^{131}I]MIBG, 148.
— immunoscintigraphy, 128.
Lung surgery, ventilation outcome, 178.
Lung uptake as marker of left ventricular disfunction, 140.
Lymphoscintigraphy, internal mammary, 96.

M

MAG3, quality control, 73.
— renal function, 73.
Malignant ocular melanoma, immunoscintigraphy, 226.
Medullary thyroid cancer, ^{131}I-MIBG therapy, 80.
Melanoma scintigraphy, false positive, 222.
Metabolic disease, 140.
Metastatic bone cancer, ^{186}Rh injection, 183.
Migraine, and ^{99m}Tc-HMPAO brain SPECT, 94.
Modulation transfer function determination, 141.
Monoclonal antibodies labeling, S II-32.
Monoclonal antibody 4C11, S II-146.
Monoclonal antibody, ^{125}I-labeled anti-T_4, 113.
— chimeric, 33.
— murine, 33.
Monoclonal antifibrin antibodies, S II-35.
Monoclonal antiplatelet antibodies, S II-35.
Mucin-like antigens, CA19-9, CA50, CA195, 95.
Multimodal medical images, 190.
Multiple myeloma, 303.
— Serum neopterin, 185.
Myocardial imaging, S II-147.
Myocardial infarction, S II-91, S II-102, S II-113, S II-144, S II-155, S II-163, S II-165.
— acute, 20.
— one-vessel disease, 153.
Myocardial ischemia, S II-97, S II-118, S II-122, S II-126.
Myocardial radionuclide angiocardiography, 81.
Myocardial metabolism, fatty acids, 70.
Myocardial perfusion imaging, S II-22, S II-29, S II-149.
— with ^{99m}Tc-Q12, 194.
Myocardial perfusion scintigraphy, S II-161.
Myocardial reperfusion, S II-113, S II-139.
Myocardial revascularization, S II-97.
Myocardial scintigraphy, 26, S II-9, S II-97.
Myocardial SPECT, S II-160.
— ^{99m}Tc-MIBI, 200.
— [^{123}I]P-IPPA, 200.
Myocardial viability, 253, 259, 267, 284, 241, 243, S II-62, S II-91, S II-97, S II-118, S II-122, S II-126, S II-157, S II-163, S II-166.

N

Nephrolithiasis, ESWL, 167.
Neuroblastoma, tomography and ultrasound imaging, 146.
Neuroendocrine tumors, monoclonal antibodies, 150.
Nimodipine, chronic cerebral insufficiency, 227.
Nitrates redistribution, S II-159.
— vasodilation, S II-163.
Nitroimidazole, 60.
Nuclear medicine, future, 337.
Nuclear medicine techniques in cardiology, 287.

O

Obesity, 41.
Office automation, in nuclear medicine, 100.
One-vessel coronary disease, lung uptake of ^{201}Tl, 177.
Osteocalcin radioimmunoassay, uremic osteodystrophy, 166.
Ovarian cancer, immunoscintigraphy, 69.
— radioimmunotherapy, 116.

P

Pancreatic cancer, serum tumor markers, 221.
Parathyroid scintigraphy, ^{99m}Tc, 139.
— ^{201}Tl, 139.
Parkinson's disease, and D2 receptors SPECT, 99.
Pediatric HIV, neurological disease, 153.
Perfusion myocardial scintigraphy, 232.
Perinecrotic ischemia, S II-155.
Peripheral vascular disease, exercise ^{201}Tl scintigraphy, 136.
— spinal cord stimulation, 233.
PET, 241, 267, 284, 324, S II-122.
— and cognitive functions, 324.
— attenuation correction, 83.
— with FDG in ACTH-secreting pituitary adenomas, 90.
PET with FDG in brain GMR measurements, 108.
Pharmacokinetics, 7.
Pheochromocytoma, [^{131}I]MIBG therapy, 80.
— imaging and laboratory tests, 161.
— sporadic and familial, 161.
Picture archiving communications system, 71, 73.
Pituitary-thyroidal response, in cardiac surgery, 203.
Planar myocardial scintigraphy, S II-157.
Plasma bone Gla protein, radiological findings, 166.
Plasma cell discrasias, 303.
Post-MI ischemia, S II-157.
Prostatic cancer, follow-up, 76.
Prostatic specific antigen, 76.
Pulmonary emboli, S II-35.
Pulmonary scintigraphy in AIDS pneumonias, ^{67}Ga, 216.
— ^{99m}Tc-HIG, 216.
Pulmonary tubercolosis, ^{67}Ga, 214.
— ^{99m}Tc-HIG, 214.
Pyramid segmentation method, in PET, 83.

Q

Q-12, ^{99m}Tc radiotracer, 114.
— as myocardial perfusion agent, 114.
Quality control, MAG, 373.

R

Radiopharmaceutical tracer, S II-108.
Radioimmunoassay techniques and quality control, renin and PRA, 137.
Radioimmunotherapy, metastatic gastrointestinal cancer, 189.
Radionuclide angiography, S II-160, S II-164.
— and dobutamine test, 105.
— dipyridamole test, 81.
— myocardial ischemia, 81.
— in right ventricular function, 151.
— liver cirrhosis, 186.
Radionuclide data, S II-152.
Radionuclide procedures, 273.
Radionuclide ventriculography, S II-148.
Radiosensitizer, 60.
Raynaud's phenomenon, S II-149.
rCBF abnormalities, ^{99m}Tc-HMPAO ASPECT, 205.
— ^{133}Xe inhalation, 205.
^{186}Re, bone pain, 183.
— boron cluster, tumor cells, 123.
Regional wall motion, 280, S II-139.
Reinjection, S II-9, S II-15.
Rejection, S II-56.
Renal artery stenosis, 309.
Renal function and essential hypertension, 145.
Renogram, quantitative analysis, 219.
Renovascular hypertension, 309.
Rest in ventricular function, S II-150.
Revised Jones' criteria, S II-154.
Rhabdomyosarcoma, alveolar, 341.
Rheumatic fever, S II-154.

S

Sarcoidosis, serum neopterin, 185.
Schistosoma mansoni, 56.
Scintigraphy, intimal medial thickening, 171.
— liver, focal nodular hyperplasia, 107.
Scleroderma, S II-149.
Septal perfusion analysis, S II-153.
Serotonin, anterior pituitary secretion, 158.
Serum AFP, hepatoblastoma, 210.
Serum CA^{125}, and gynecological oncology, 131.
Serum myosin, immunometric assay, 111.
— myocardial cell damage, 111.
Serum neopterin, HIV infection, 185.
— multiple myeloma, 185.
— sarcoidosis, 185.
— tumor marker, 167.
Serum, free thyroxine, 113.
Severe stress and ^{201}Tl reinjection, 134.
Single kidney filtration fraction, effective renal plasma flow, 145.
— glomerular filtration rate, 145.
Single vessel coronary artery disease, S II-155, S II-156.
Sjögren's syndrome, xerotrachea, 180.
SPECT, 319.
SPECT ^{99m}Tc-MIBI, 74, 93, S II-141.
SPECT in nuclear cardiology, S II-108.
— ^{201}Tl stress/redistribution, 169.
— brain damage evaluation, 109.
— brain tumors, 74.
— dopamine receptor, 107.
— in brain tumors with ^{201}Tl, 101.
— of D2 receptors in Parkinson's disease, 99.
Spinal cord injury, renography, 179.
Stress ^{201}Tl-SPECT, S II-140.
Stress echocardiography, 273, S II-157.
Stress test, S II-156.
Systolic left ventricular function, S II-149.

T

TCA, labeled hormone, 143.
^{99m}Tc-MIBI, 2, 241, 284, 315, S II-130, S II-139.
— gated studies, S II-153.
— imaging, S II-163.
— scintigraphy, 259, S II-162.
— SPECT, S II-167.
— uptake, S II-153.
^{99m}Tc-propylene amine oxime, 46.
^{99m}Tc-2 methoxy-isobutyl-isonitrile, 2.
^{99m}Tc-labeling and immunoreactivity, 106, 296.
^{99m}Tc myocardial perfusion agents, 157.
^{99m}Tc-nitrido dithiocarbamates, S II-147.
^{99m}Tc phantom studies, S II-160.
^{99m}Tc-Teboroxime, S II-22.
^{99m}Tc(III) cation agent, S II-29.
^{99m}Tc, labeling of peptides, 106.
^{99m}Tc, radiopharmaceuticals labeling, 229.
^{99m}Tc-DTPA renal sequential scintigraphy, 145.
^{99m}Tc-ECD, blood and brain kinetics, 188.
^{99m}Tc-F(ab')$_2$-antimelanoma, 162.
^{99m}Tc-HIG, in pulmonary scintigraphy in AIDS pneumonias, 216.
— in pulmonary tubercolosis, 214.
^{99m}Tc-HMPAO brain SPECT in AIDS dementia, 125.
^{99m}Tc in migraine, 94.
— in Parkinsonism, 107.
^{99m}Tc-HMPAO granulocyte scintigraphy, 92.
^{99m}Tc-HMPAO SPECT in pediatric HIV, 153.
— brain, 147.
— carotid atherosclerosis, 112.
— central nervous system, 112.
— HIV-1 encephalopathy, 180.
— hypertension, 132.
— Lupus, 112.
— nimodipine, 227.
^{99m}Tc-HMPAO, blood and brain kinetics, 188.
— cerebral perfusion, 173.
— hyperbaric oxygen treatment, 176.
— peritoneal dialysis, 186.
— radiolabeled leukocytes, 186.
— transient global amnesia, 174.
^{99m}Tc-labeled HIG, lung infections, 202.
^{99m}Tc-MAA, aerosol, 181.
— pulmonary perfusion, 178.
^{99m}Tc-MAG3, renal function, 167.
— sphinterectomy, 179.
^{99m}Tc-MDP, age-related whole-body, 224.
— segmental retention, 224.
^{99m}Tc-MIBI and coronary artery disease, 153.
^{99m}Tc-MIBI cardiac imaging, myocardial viability, 160.
^{99m}Tc-MIBI imaging, chest pain, 223.
— non-diagnostic ECG, 223.
^{99m}Tc-MIBI kinetics, S II-130.
^{99m}Tc-MIBI perfusion, myocardial infarction, 133.
^{99m}Tc-MIBI SPECT, coronary artery disease, 234.
— IMA post thrombolytic therapy, 231.
^{99m}Tc-MIBI, brain tumors, 74.
— first-pass ventriculography, 93.
— gated SPECT in coronary artery disease, 89.
— heart, 172.
— in coronary artery disease, 83.
— left ventricular volumes, 195.
— leg claudication, 118.
— lung uptake, 140.
— myocardial scintigraphy, 141.
— parathyroid glands, 87.
— rest, myocardial infarction, 121.
— SPECT in anterior myocardial infarction, 93.
— /SPECT and hybernating myocardium, 146.
^{99m}Tc-MoAb and lung cancer, 128.
^{99m}Tc-Q12, biodistribution, 194.
— biological behaviour, S II-29.
^{99m}Tc-teboroxime, ischemic and viable myocardium, 235.
^{99m}Tc-Tecnemab-K1, melanoma scintigraphy, 222.
Tenascin, breast tumors, 230.
Testosterone, free, 20.
Tetralogy of Fallot, surgical correction, long-term follow-up, 151.
Thalassemia intermedia, and gonadal function, 103.
^{201}Tl, 26, 241, 243, 284, S II-5, S II-9, S II-15, S II-68, S II-102, S II-122, S II-144.
— myocardial scintigraphy, 177.
— one-vessel coronary disease, 177.
^{201}Tl antimyosin antibody, S II-91.
^{201}Tl cardiac imaging, myocardial viability, 160.
^{201}Tl fixed defects, S II-158.
^{201}Tl lung uptake, S II-156, S II-161.
^{201}Tl myocardial scintigraphy, S II-142, S II-144.
^{201}Tl perfusion scan, peripheral vascular disease, 233.
^{201}Tl perfusion scintigraphy, S II-163.
^{201}Tl redistribution, 243, S II-159.
^{201}Tl reinjection, 88, 253, S II-155, S II-157, S II-165.
— redistribution imaging, 134.
^{201}Tl rejection scintigraphy, S II-62.
^{201}Tl resting, S II-153.
^{201}Tl scintigraphy, 259, 280.
— arterial obstructive disease, 136.
^{201}Tl stress test, 253.
^{201}Tl tomography, S II-155.
^{201}Tl, and chronic coronary disease, 117.
— and SPECT in brain tumors, 101.
^{201}Tl, ischemic and viable myocardium, 235.
^{201}Tl, perinecrotic and remote myocardial ischemia, 94.
^{201}Tl, redistribution and reinjection, 94.
^{201}Tl, rest, myocardial infarction, 121.
^{201}Tl, split dose myocardial scintigraphy, 105.
^{201}Tl kinetics, S II-15.
Three-phase bone scintigraphy, 170, 175.
Thrombolytic therapy, S II-163.
Thymidine kinase radioenzyme assay, leukemia, 166.
— breast cancer, 137.
Thyroid adenoma hyperfunction, pharmacological treatment, 150.
Thyroid cancer, follow-up with ^{131}I, 144.
— monitoring, 77.
— multivariate analysis, 98.
— scintigraphy with ^{123}I, 77.
Thyroid carcinoma, ^{131}I-total body scan, serum thyroglobulin, 201.
— neck high resolution ultrasonography, 201.
— postsurgical treatments, 199.
— thyroglobulin, 191.
Thyroid function, Down's syndrome, 198.
Thyroid nodule, 315.
Transesophageal pacing, S II-162.
— stress, 217.
Transient global amnesia, SPECT study, 174.
TRH T, i.v. infusion, 174.
TSH, 315.
Trifluoroperazine, S II-113.
TSH immunoassay, hormone concentrations, 236.
Tumor, 60.

V

Viability assessment, 273.

W

Werner's test, Graves' disease, 192.
Wolff-Parkinson-White syndrome, S II-140.

X

^{133}Xe, activation by pain, 200.
